

Information regarding the European regulation for Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) (EG 1907/2006)

According to the provisions of REACH Mesa Parts as a manufacturer of products is to be regarded as a downstream user. As a matter of principle, Mesa Parts as a downstream user observes all requirements resulting from REACH.

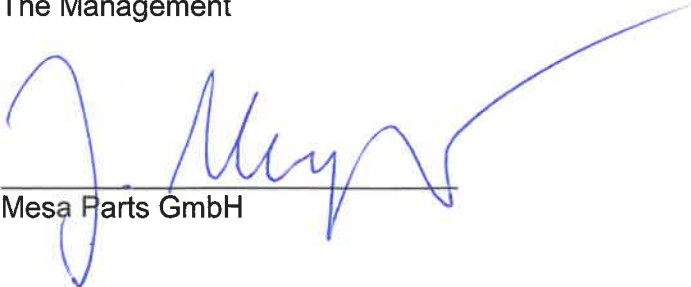

Products which you purchase from us, are by definition of REACH, not to be registered. Chemical substances contained in our products which may possibly be subject to registration, have to be registered exclusively by our pre-suppliers.

In our own interest and to ensure a high level of safety in our production, we observe the implementation of REACH and its resulting demands closely. In particular, we contacted our pre-suppliers from whom we purchase chemical substances and preparations. We use these substances in the course of our production process (e.g. auxiliary substances like lubricants, adhesions, colorings, lacquers etc.). Our processes are mainly standard applications which are operated in many industries in large tonnages.

If we receive information about SVHC-substances in products from our sub-suppliers, we will immediately forward this information to our customers in compliance with Art. 33 REACH-regulation.

In case of further questions regarding the implementation of the REACH regulation in our company, please do not hesitate to contact us.

The Management
